

Thing I learnt in week 1

DURING THIS PPT I'LL SHOW
SCREENSHOT AND WHAT IT
TAUGHT ME IN DETAIL

I learnt how to use chat gpt and how i can get job application

- Chat gpt is very useful when it come to getting a job this is because it help us to get better result and better interview and better tip when going to one here a prompt, I asked chat gpt.
- It show me step-by-step to how to get ready and apply for one and you can even ask question how crazy is that!

can you give me tip on getting a job and help me get on please?

Absolutely, I'd be happy to help you get a job — let's take this step by step. Here's how we'll approach it:

✅ Step 1: Figure Out What Kind of Job You Want

Questions to ask yourself:

- What type of work do you want to do? (e.g., retail, admin, tech, trades, freelance, etc.)
- Do you have any specific skills, certifications, or experience?
- Are you open to remote work, or do you want something local?
- Are you looking for something full time, part time, or temporary?

📝 If you tell me more about your background and goals, I can give tailored advice and even help write your resume or apply to specific jobs.

✅ Step 2: Prepare a Resume and/or Portfolio

If you already have a resume, I can review and improve it. If not, I'll help you write one from scratch.

💡 Tip: Your resume should be:

- One page (for most entry-level or junior roles)
- Focused on your skills, experience, and relevant achievements
- Clear, clean layout with no spelling mistakes

Want help with a resume right now? Just say "make me a resume" and tell me your work history and the job you're aiming for.

✅ Step 3: Job Search Strategy

Where to look:

- Indeed
- LinkedIn Jobs
- Glassdoor
- Jobcase (great for entry level)
- Snagajob (for hourly work)
- Local Facebook job groups or Craigslist

💡 I can also help you write cover letters or short applications for each job.

✅ Step 4: Apply & Follow Up

Tips:

- Apply to at least 5-10 jobs a day
- Customize your resume slightly for each application (I can help automate this)
- Follow up 3-5 days later with a short message if possible

✅ Step 5: Prepare for Interviews

I can help you:

- Practice common interview questions
- Come up with strong answers based on your experience
- Sound confident, even if you're nervous or new

• Learnt how to use chat gpt to make youtube script or ideas

Chat gpt give me a idea and a script on my first YouTube video I want to get 1,000 Subscriber easily!

Great goal! Hitting your first 1,000 subscribers on YouTube is totally doable — especially if you start with a high impact, attention-grabbing first video that taps into what people want to see. Let's build this right!

🔥 High-Impact YouTube Video Idea (That Can Go Viral)

Video Title/Concept:
"I Tried [X] So You Don't Have To — Here's What Happened"

Example:

- "I Tried Waking Up at 4AM for a Week — Here's What Happened!"
- "I Ate Like The Rock for 3 Days — My Body's Reaction Was Wild!"
- "I Used AI to Plan My Life for 7 Days — Was It Worth It?"

This type of content works because it's:

- Relatable but unique
- Entertaining with a bit of personal storytelling
- Searchable and clickable with curiosity ("What happened?")

📄 Script Outline for Your First Video
Here's a customizable script structure you can follow (with examples):

🔥 1. Hook (First 5-10 seconds)

Grab attention FAST.

Example:

"I wake up today at 4AM — on purpose. Why? Because I heard it changes your life. So, I decided to try it for a week. Here's how it went..."

🔥 2. Quick Intro / Why You're Doing This (20-30 seconds)

Introduce yourself briefly and explain the challenge or experiment.

Example:

"Hey, I'm [Your Name], and I'm on a mission to try weird or challenging things to see if they actually work. This week, I took on the 4AM wake-up routine that successful people swear by. Spoiler: it was harder than I thought."

🔥 3. Daily Progress / Journey (2-4 minutes)

Document each day like a mini vlog.

- Your mood
- What happened
- Any struggles or wins

Example:

"Day 2: I literally almost fell asleep in the shower. Not even kidding. But I did get more work done by 10AM than I usually do in a whole day..."

🔥 4. Results / What You Learned (1-2 minutes)

Reflect honestly. Share what you learned.

Example:

"By the end of the week, I realized it wasn't just about waking up early — it was about discipline. But will I keep doing it? Honestly... maybe not every day."

🔥 5. Outro / Call to Action

Ask viewers to subscribe in a natural, friendly way.

Example:

"If you liked this video and want to see more weird challenges or self-improvement experiments, hit that subscribe button. I'm doing a new one every week — and trust me, they're only getting crazier."

📁 Bonus Tips to Get Your First 1,000 Subs:

- **Use shorts** — repurpose clips from your video into YouTube Shorts with catchy captions.
- **Comment on similar creators** with thoughtful replies (don't spam).
- **Post consistently** (1x/week is enough to start).
- **Ask viewers a question** in the comments like:
| "What challenge should I try next?"

📄 Want Me to Write the Full Script?

If you give me the exact idea you want to do (ex: "I tried living without my phone for a week"), I can write a full 3-4 minute script and even help you come up with a thumbnail & title combo that grabs clicks.

Just say the word and tell me what you're thinking of doing!

🗨️ 📄 🔄 📌 📁 📎

- Chat gpt can also help with doing AI automation it can help you reach your first 1,000 Subscriber on YouTube with no effort! All you have to do is ask chat gpt to give you a idea and script for your first YouTube video like this.
- Just like this. Simple, Fast, Easy.

• Learn how to use chat gpt to make blog articles

- You can also ask chat gpt to make you a blog articles Aswell. It will just ask you 5 question and all you have to do is answer each one of them and few seconds later it will be ready with your Blog Article!

Make me Blog Article about travelling about 300-500 words Make a good title and give it a nice welcoming tone

Sure! Here's a 300-500 word blog article on traveling, with a warm, welcoming tone and an engaging title:

Wander Often, Wonder Always: Why Travel Is the Best Gift You Can Give Yourself

There's something magical about packing a bag, stepping outside your comfort zone, and landing somewhere completely new. Whether it's a bustling city you've only seen in movies or a quiet coastal town that barely makes it to the maps, travel has a way of opening your eyes — and your heart.

I still remember my first solo trip. I was nervous, unsure of what to expect, and absolutely terrified of getting lost. And guess what? I did get lost — more than once. But in those moments, I learned how to ask for help, read a map (kind of), and trust myself. That trip didn't just change my location — it changed me.

Travel doesn't have to be expensive or far away. Sometimes the best adventures are just a train ride or road trip from home. It's about the feeling of discovery — trying new foods, hearing unfamiliar languages, seeing sunsets from different angles. It's about the stories you collect, the people you meet, and the way even a brief encounter can stick with you forever.

More than anything, travel reminds us that the world is so much bigger — and kinder — than we think. You realize that no matter where you go, laughter sounds the same, food brings people together, and a smile goes a long way.

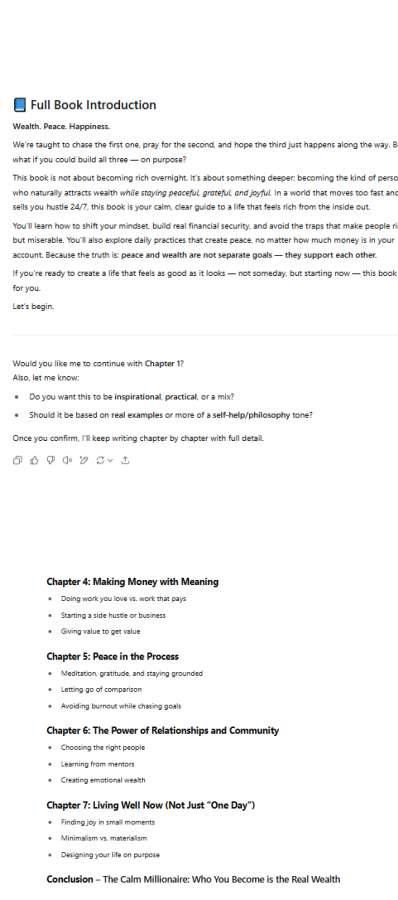

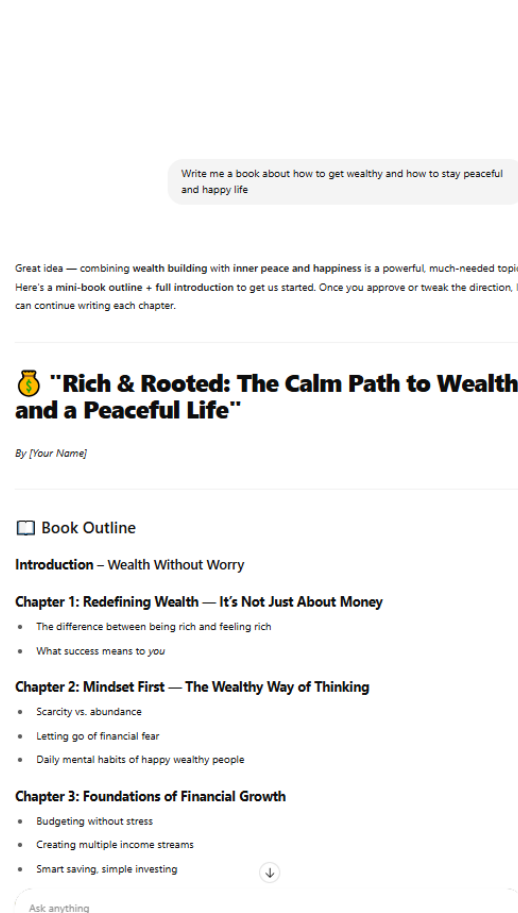

So if you've been daydreaming about that trip, take this as your sign to go. Book the ticket. Chase the horizon. Get a little lost. You might just find something you didn't even know you were looking for.

And when you come back? You won't just have photos and souvenirs. You'll have memories, lessons, and a heart a little fuller than before.

Safe travels, my friend — the world is waiting.  

Would you like this turned into a blog layout (HTML/WordPress format)? Or want another one for a specific destination or style (funny, luxury, backpacking, etc.)?

     

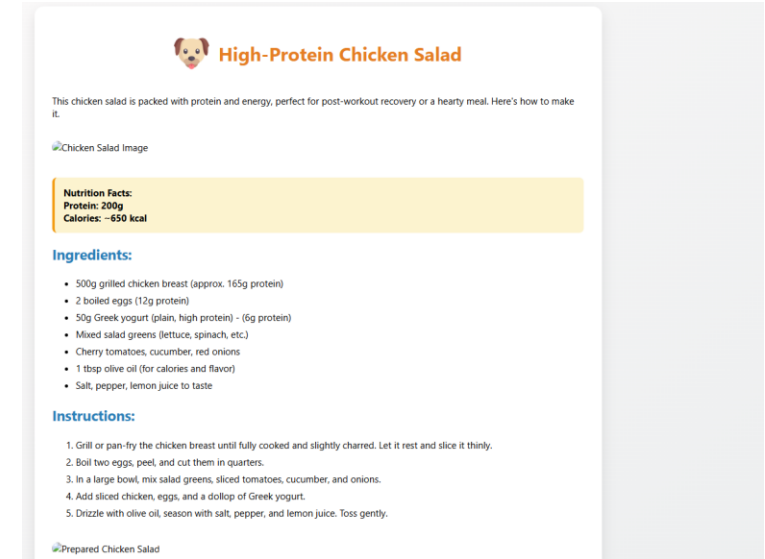

- Learnt how use chat gpt to make a book
- Making a book may be hard without AI since you don't know how to start or where to start but with the technology getting smarter and smarter each day we have chat gpt to save our day!
- I can ask chat gpt to write me a book about how to get rich and have a peaceful nice happy life like this.

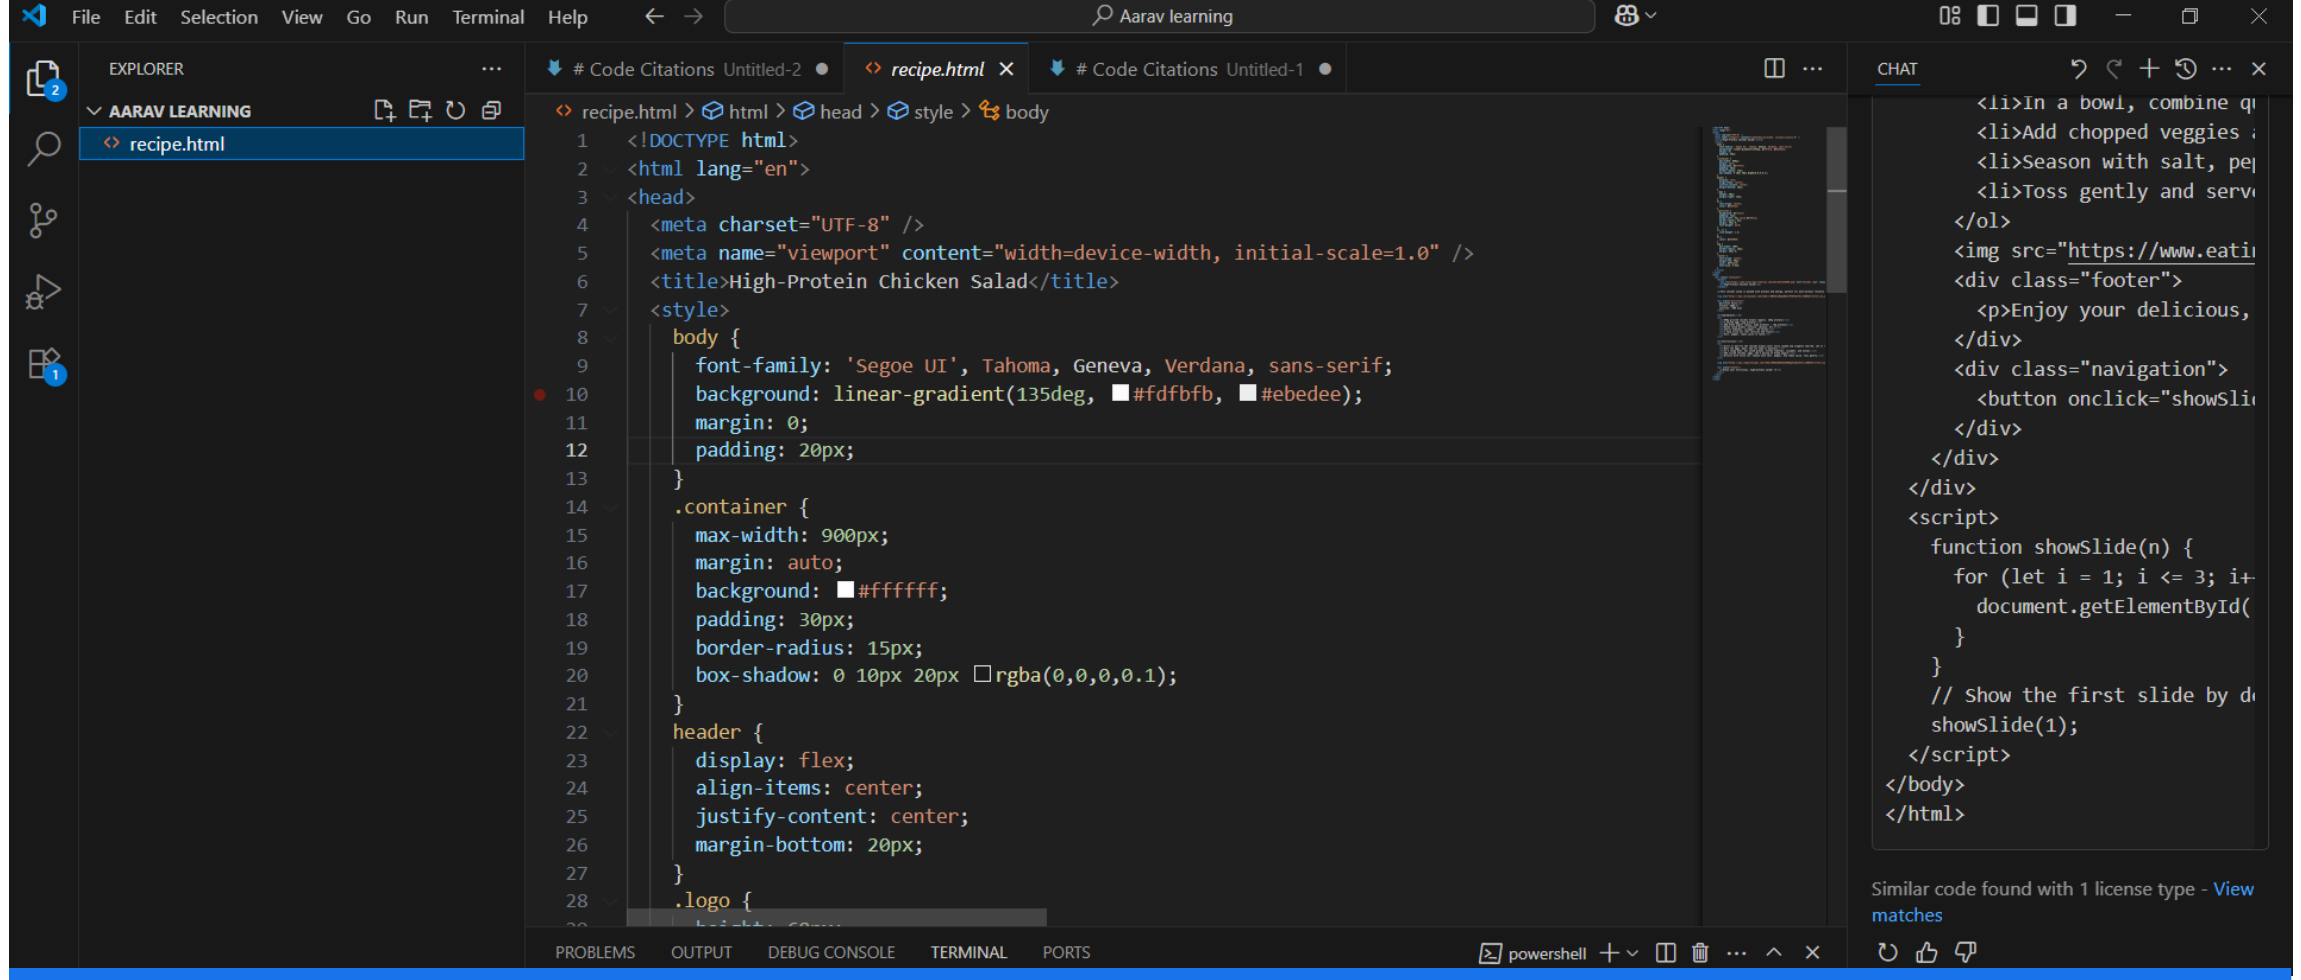

Learnt how to use chat gpt to make coding website

- Making a website back in the days was very hard you would need to master basically most of the coding skill but now it the opposite I made a website through chat gpt I asked to wrote a prompt saying that "Can you create me a website with a chicken salad recipe with 200g of protien etc,etc" after that it generated me a code like this and the result came out like this.

```

<!-- Chicken Salad Recipe -->
<!-- Main Content Area -->
<!-- Recipe Title -->
<!-- Description -->
<!-- Nutrition Facts -->
<!-- Ingredients -->
<!-- Instructions -->
<!-- Prepared Image Placeholder -->
```

- **How to use copilot on VSC**

- I even enchanted my website by using copilot and adding more pages more recipes here a script of code from VSC.

Learnt to make my own AI and how it can identify trading charts through Teachable Machine .

- It 100% worked for me I made profit and I can't open the file for some reason but here some of the stuff

Another one done by me

The screenshot displays a machine learning training interface. On the left, two data classes are defined: 'Healthy kidney' with 14 image samples and 'Nephrotic syndrome kidney' with 15 image samples. Each class has 'Webcam' and 'Upload' buttons. A dashed box at the bottom left contains an 'Add a class' button. In the center, a 'Training' panel shows a 'Model Trained' button and an 'Advanced' dropdown menu. On the right, a panel shows an 'Import images from Google Drive' button, a preview of a kidney tissue image, and an 'Output' section. The output section lists two classes: 'Healthy kidney' with an empty progress bar and 'Nephrotic syndrome kidney' with a full progress bar at 100%.

Healthy kidney

14 Image Samples

Webcam Upload

Nephrotic syndrome kidney

15 Image Samples

Webcam Upload

Add a class

Training

Model Trained

Advanced

Import images from Google Drive

Output

Healthy kidney

Nephrotic syndrome kidney

This is week 1 of what I learnt so far with AI and what you can achieve in short amount of time

- In this journey I walk the path of mastering AI automation and how ai was created and how it has been improving day by day and within these two week I will show what I can do with these AI skill.

The collage illustrates the integration of AI into various domains. At the top left, a code editor shows the HTML and CSS for a web page titled 'High-Protein Chicken Salad'. To its right is a 'Training' interface with a 'Model Trained' button and an 'Advanced' dropdown. Below the code editor is a terminal window showing the command prompt 'PS C:\Aarav learning>'. On the right side, there is a histology image and an 'Output' section with labels like 'Healthy kidney' and 'Nephro... syndr... kidney'. At the bottom, a candlestick chart with blue trend lines is displayed, suggesting AI's application in financial analysis.
